## Rubin

135 - 150 HP

**S**AME Rubin redefines Power and performance with no compromise and no equal. Without question the SAME Rubin has the most advanced transmission and control system available in New Zealand today. Try it you won't be disappointed with the performance.

## Have you met Rubin yet?

- The quietest cab on the market at only 72DbA with optional self-levelling and air suspension.
- The SAME Rubin features electronic engine control giving constant power and unbeatable fuel efficiency.
- A 27 x 27 transmission includes 18 speeds available on the powershift with extremely smooth changes. Also features SAME's automatic power shift.
- All controls are mounted on the operators arm rest and joystick including a new sequential control for repetitive operations.
- The heavy-duty rear linkage boasts a massive lifting power of 8600kg.
- Ergonomically the Rubin has no equal and so the increased operator comfort and user friendly controls matched with the engine management systems will ensure that the SAME Rubin will make your business more productive and profitable.
- Clutchless reverse with a wet clutch ensures effortless and reliable operation.

## Solaris

25 - 35 - 45 HP

**S**olaris machines have high-tech instrumentation to make driving simple and safe, and are powered by engines capable of producing power and performance while keeping fuel consumption and noise levels incredibly low.

\* Optional factory Cabin

- The synchromesh gearbox has 12 forward and 12 reverse speeds, and shuttle saving precious time on manoeuvres. 25 HP hydrostatic models available.
- Oil-immersed disc brakes ensure maximum effectiveness and safety when the pedal is pressed.
- A wide variety of implements and equipment can be operated from three P.T.O. shafts: 540/1000 rpm at rear, 2000 rpm at mid and front (opt). Live P.T.O. is standard on all models.
- Solaris features as standard, high flow 30 Lpm with 2 hydraulic remote valves. With other valves optional, the great versatility of the SOLARIS is demonstrated still further.
- An electrohydraulically operated front differential lock ensures maximum grip with comfortable control - optional, standard on 45.
- A choice of tyres is also available: agricultural type for cultivation, or grassland for parks and gardens, where a heavy tread would damage lawns and greens.

## Same's Unique Features

### Electronic Engine Management

Electronic engine control ensures an instant response to any changes in load by optimising injection. This results in lower fuel consumption, reduced emissions and constant power.

### Agroshift

Agroshift, the powershift without power loss. Designed to give you the right ratio for each job, the Agroshift delivers the ability to shift power smoothly through three speed bands under load.

### Reverse Steer Positions

Designed with operator comfort in mind, the range of reverse steer available means there's a tractor for every task from forklifting to forage harvesting.

### S.B.A Traction System

The S.B.A. system means that both four wheel drive and front and rear diff lock are selected and deselected automatically and only when required. This leaves the operator to concentrate on the driving, knowing that the traction potential will be managed to perfection.

### True Four Wheel Drive

Combined front and rear diff locks maximises traction and reduces wheel slip. Particularly suitable for working on hills

### True Four Wheel Braking

Oil immersed disc's all round and front brakes fitted directly to the wheel hubs ensure greater effectiveness giving greater safety and longer life.

*SAME engines provide not only an economical and durable power plant, the engine is designed from the start to be an integral part of the tractor. It's narrow design accommodates large front tyres, ensuring a tight turning circle and is itself self supporting to carry ever increasing loads on the tractors rear and front linkage systems.*

## Utility Models

# Explorer ROPS

70 - 80 - 90 HP

# Explorer Top Series II

*'Top' Cabin Series 80-90 HP range*

**T**op in value SAME's new Explorer range of 80 and 90 HP cabin tractors now feature high - visibility bonnets. Economic, modern and reliable SAME 1000 series air/oil cooled engines provide class leading fuel economy.

- An all purpose transmission with forward reverse shuttle, 40 kph (90 hp) and the ability to change gear on the move.
- True four wheel braking.
- Generous hydraulic lift capacity of 3450 kg at the rear, 2 remote valves fitted as standard and high - flow pump ensures total versatility.
- Comprehensive PTO speeds.
- Comfortable, flat floor cab with all levers mounted to the side for easy access, fully adjustable steering column and seat and electro hydraulic controls to make driving effortless.
- Now available in flat platform ROPS version.

## Orchards & Vineyards

# Golden

60 - 65, 75 - 85 HP

The name of SAME embodies experience and tradition, with a reputation for particular sensitivity to the needs of growers. This reflects in their new state of the art Golden horticultural tractor.

- With proven high capacity engines, air/oil cooled for simplicity and class leading fuel economy. SAME's modern engines provide constant power and generous torque rise in a compact and reliable design.

- 60 degree steering angle and a steering radius of 2905mm (65hp), means the GOLDEN is the most maneuverable tractor on the market.
- Transmissions tailored to horticultural use and with various options including 24 x 12; 30 x 15 and SAME's unique 3 speed powershift system, 'Agroshift' providing 45 forward x 45 reverse speeds, from creeper to 40 kph.
- PTO drive is engaged and disengaged at the push of a button.
- Golden tractors also feature responsive and efficient oil-immersed disc brakes on all four wheels.
- Optional compact and quiet factory cabins are available with full air conditioning and carbon filters. Non-cab models are fitted with folding safety frame.
- Available in widths from 1.25m down to .985m the SAME Golden can fit anywhere you need it to.

# Frutteto II

60 - 75 - 85 HP

**S**AME's proven and award winning Frutteto range now features 'new generation' styling and a range of specifications to suit most growers. SAME's latest range of compact, powerful and yet frugal engines are also available with electronic injection for exact control of engine speed.

- Synchronised gears and true shuttle shift provide maximum productivity.
- Compact dimensions and rounded profiles combined with excellent maneuverability to make the Frutteto a versatile work horse.
- Excellent PTO horsepower for any implement.
- Reversible driving position can be specified giving dual direction performance for specialised operations such as mulching or forklift operations.
- Choose from open cab or full carbon filtered and air-conditioned factory cabs.

## Utility Models

### Argon 50 - 60 - 70 HP

The SAME 1000 series engine is powerful and flexible with exceptionally low fuel consumption. A 24 forward and 12 reverse speed transmission equipped with a synchronised shuttle and top speed of 40 kph means maximum productivity.

- SAME's unique 4 wheel braking system assures safety.
- Operator friendly design with all gear levers logically mounted to the side, an independent hydrostatic steering system and adjustable suspension seat.
- Three speed PTO for maximum versatility and a rear linkage lift capacity of 2900kg combined with two double acting spool valves and 45 l/min hydraulic pump.
- Exceptional maneuverability due to SAME's own 55 degree steering angle front axle.
- Maximum in-field performance provided by a good power to weight ratio, large radial tyres and easy to use front and rear diff-locks for true 4WD performance.

### Dorado

55 - 65, 75 - 85 HP

Economic, powerful and modern SAME 1000 series engines. Large 3 or 4 litre capacity with all the power and torque you demand. Choose from either a synchro transmission or SAME's class leading "Agroshift", a 3 speed powershift for effortless gear changes under load. Providing 45 forward and reverse speeds and a top speed of 40 kph.

- Factory Cabin or ROPS models.
- Push button 4WD differential locks and PTO for effortless control.
- Superb operator comfort with a totally flat platform and easy to use controls.
- High comfort air conditioned Factory Cabin with fully adjustable seat and steering wheel.
- 48 litre a minute hydraulics, 3 remotes, quick-hitch rear linkage and powerful 2900 kg lift capacity.
- Three speed PTO engaged by the push of a button.
- Unmatched maneuverability with a 55 degree steering angle.
- Complete safety due to SAME's 4 wheel braking system. Proven to be the safest.
- Big tractor performance, with front and rear diff-locks for true 4WD and large dimension radial tyres.

## Performance Plus

### Silver

80 - 90 - 100, 110 - 130 HP

The SILVER range from SAME incorporates much of the advanced design and technology from larger models, in a high performance and versatile machine. Designed to meet the needs of discerning operators.

- SAME's 1000 series engines, mean high performance and efficiency thanks to dual cooling and electronic injection control, standard on Hydrive models. The 100-130 hp models feature a 6 cylinder, 6000cc engine.
- SAME Agroshift, with 3 speed power shift is standard on all models, providing not only a creeper box but also 40 kph.
- Fully synchro forward/reverse shuttle for ease of use. Features SAME unique 4 wheel braking.
- A powerful hydraulic system, incorporating superb electronic linkage control with the ability to control wheelslip (100 hp+ models) and 2 remote valves providing 58 l/min and Quickhitch link ends.
- SAME SBA patented traction system.
- SAME HYDRIVE - Clutchless forward and reverse shuttle using two oil immersed "longlife" disc assemblies making this system virtually maintenance free.

### SAME Rock

With three propulsion units -55, 60 or the awesome 70 HP and ten different versions to choose from, you can be sure that there is SAME Rock that meets your requirements exactly.

For all work in vineyards or orchards, on hillsides, or in difficult soil conditions, the SAME Rock is the ideal solution.

- Ultra-compact dimensions combined with superb handling increase productivity in extreme conditions and highly-specialised applications.
- The 1000 series engines (3-cylinder version on the ROCK 55 and 60 and 4-cylinder for ROCK 70) provide consistently high torque reserves, even at medium-high engine speeds.
- Reduced fuel consumption and large fuel tanks (60 litres on the ROCK 55-60 and 90 litres for the ROCK 70) gives greater productivity.
- The mechanical gearbox of the SAME Rock is offered in three different versions: • **With direction reverser:** 8 forward and 8 reverse speeds; • **With creeper:** 12 FWD + 8 REV, with a minimum speed of 0.52 km/h; • **With mini-reduction:** 16 FWD + 8 REV.
- Pedal-operated clutch and hydraulic system is equipped with a 38 l/min pump and 4, 6 or 10-way spool valves configured for implements which require holding or floating control.
- Equipped with a smooth, precise clutch, the PTO offers a choice of three speeds: 540, 540 ECO, and 1000 rpm.
