

Technological marvels

NEWS
COO

A small red tractor with a white canopy is driving on a field of harvested grain. The tractor is positioned on the left side of the frame, moving towards the right. The ground is covered in a layer of golden-brown grain. In the background, there are dark, silhouetted mountains under a cloudy sky. The words "NEWS" and "COO" are written in large, dark, block letters on the ground, with the tractor appearing to be driving through the "O"s.

Diamond 230-260

The diamond, tip of **SAME** technology.

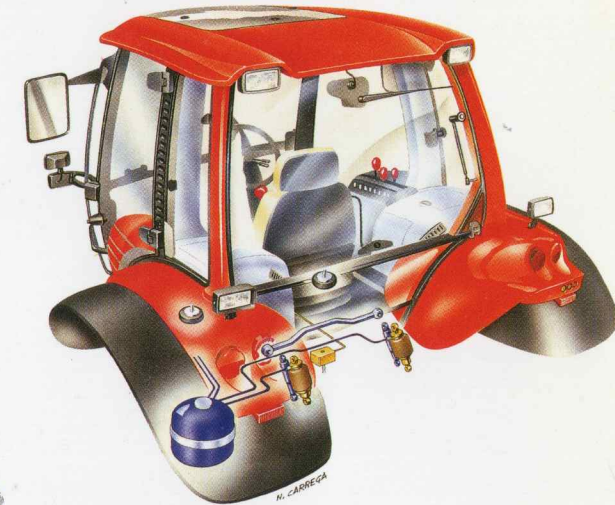

Diamond is the all new SAME range of high-power tractors, in which smart design features actively optimise performance standards, while harmony of shape helps harness their extraordinary power. Once again, the creative genius of Giugiaro has excelled itself in this perfect expression of "dynamic energy": original and imaginative, unique, yet unmistakably in the SAME tradition.

2 models: 230 - 260 HP

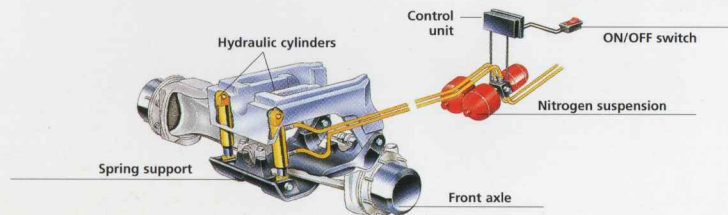

- 6-cylinder water-cooled engine, featuring turbo and intercooler, with electronic power control
- progressive, constant power and torque curves
- high-quality ZF transmission with Powershift 40 + 40 speeds, torque converter
- electro-hydraulic PTO clutch
- lifting capacity over 10,500 kg
- front lift equipped with a double-acting cylinder and a lifting capacity of 5,100 kg
- SBA system with automatic drive and differential lock engagement control
- self-levelling pneumatic cab and suspended front axle for active comfort in all conditions
- low running and maintenance costs

RUBIN 120-135-150

Strong, economical and durable.

RUBIN represents the new generation of medium-high power SAME tractors. Totally original design, exceptional performance, the most versatile Powershift transmission available and a standard of comfort guaranteed in all working conditions - the exclusive RUBIN "active comfort". Strength and beauty now go hand in hand.

Just take a look at the remarkable features on the 3 RUBIN models 120 - 135 - 150 HP

- 6-cylinder water-cooled engine
- progressive, constant power and excellent torque reserves.
- electronic Powershift: 18 twin-sequence speeds plus 9 creeper speeds and automatic Powershift
- "load sensing" hydraulic system with 103 l/min adjustable flow
- electronically-controlled rear lift with radar
- monocoque pneumatically suspended self-levelling cab with high-visibility roof
- suspended front axle for maximum comfort and driving safety
- pneumatically suspended driver's seat
- analogue/digital instrument panel with performance monitor
- hydrostatic braking on all 4 wheels
- steering angle of 55°

All round reliability.

SUPER TITAN

Proven and tested technology, updated with the latest SAME features, for even more practical and productive operations in the field and easier implement control. Unfailing strength in all conditions, on all terrain.

- new lateral exhaust on left upright
- air filter and dust unloader under hood
- extra-strength front lift (3,200 kg) and new 3-Point linkage with tip-up lift links
- articulated front fenders (optional)
- rapid-adjustment rear hitch
- heavy-duty rear linkage
- stabilisers with upswing lock
- tie-rod and hydraulic top link (optional)
- innovative transmission oil filter and cooling system
- large rear-view mirrors
- additional work lights
- door with pre-arrangement for cab cabling
- larger toolbox

SPECIAL FOR SUPER TITAN

- larger final drives
- 42" rear tyres

The Argon is now even greater value for money, because SAME pays attention to the demands of those who need a simpler tractor. The new Argon range comes with an unmistakable design and the most modern technological features, such as the new improved steering to make work in the field even easier. Features and details to enhance tractor comfort, versatility and safety, even in the heaviest conditions.

3 models: 50 - 60 and 70 HP

- smooth modular design and rational maintenance
- powerful, versatile SAME engines for high performance and low fuel consumption
- control levers on driver's right
- gearshift with synchromesh shuttle
- powerful (2,900 kg), easy-control hydraulic lift
- braking on all 4 wheels
- steering angle of 55°

More than just value for money.

ARGON 50-60-70

The success story continues.

FRUTTETO II

A range of tractors whose success is based on their essential practical characteristics continues to enjoy the favour of the public, thanks to the medium between performance and economy, operating simplicity and low maintenance. Real performing specialists, giving you the very best of SAME technology.

3 models: 60 - 75 and 85 HP

- gearshift with 24 forward and reverse gears, with synchromesh shuttle
- pressurised cab with climate control
- hydraulic circuit with 52 l/min capacity
- 4 and 6-way auxiliary control valves
- electronic front and rear lifts
- reversible driving position
