An Ordinary Rider***

Bolens Articulator™

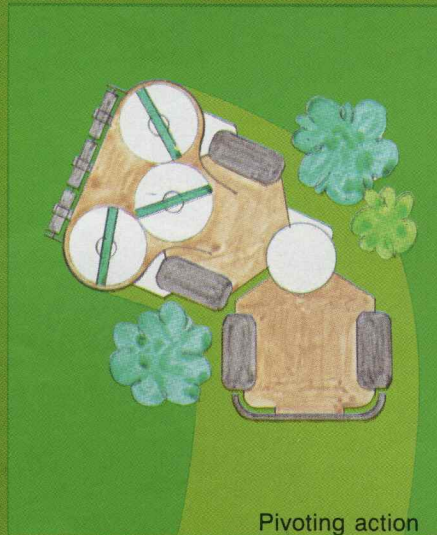

The Ultimate In Residential Lawn Care

No other machine can follow in its own tracks

Unlike ordinary riders, this Lawn Machine combines the close-in trimming and maneuverability of a walk mower with the comfort and work power of a tractor. You won't find a more maneuverable or better cutting Lawn Machine.

Superior mowing: the front mounted mower grooms grass evenly before tires can flatten it. 3-blade high-lift overlapping mower gives smooth, even cut. Rear discharge design lets you use a lawn sweeper for easy clean-up. Full width front rollers help mower follow ground contours. Big 42" mower cuts big jobs down to size.

The center-pivoting, full-frame steering design lets you make sharper, tighter angle turns allowing closer trimming of

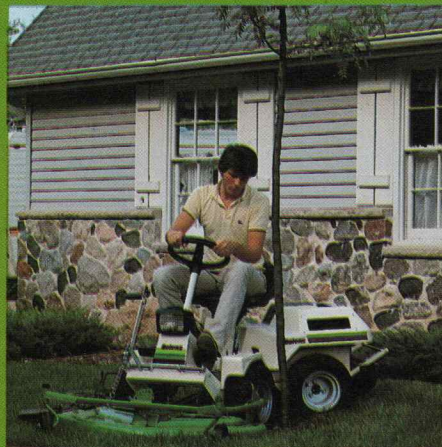

walks and along driveways. You can cut square corners, edge up to and under low hanging branches and fence lines.

Superior Maneuverability

The Bolens Articulator frame steer riding mower can trim around trees, zig-zag between bushes and make tight "square" turns next to sidewalks and driveways. The center-pivoting concept also offers greater ground hugging stability.

Closer Trimming

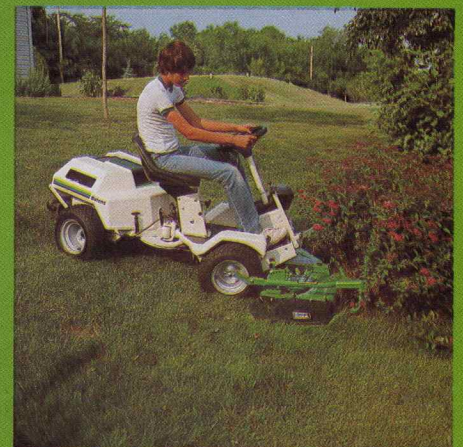

Designed to solve one of the toughest lawn care problems—trimming closely around trees, between shrubs, and through intricate landscaping—the Bolens Articulator gets you in and out of those tight spots with no need to "jockey" back and forth.

Superior Maneuverability

Superior Mowing

Closer Trimming

Features

- Powerful 11 hp synchro-balance Briggs & Stratton engine with electric start.
- Totally enclosed engine and automotive type muffler give extra quiet ride.
- Engine is located in rear to leave heat and exhaust behind.
- Big 42" mower to cut big jobs down to size.
- Rear discharge design allows for close trimming on both sides.
- 3 blade mower deck for smooth, even cutting.
- High lift overlapping blades for superior cutting performance.

Features

- Front mower gauge wheels follow ground contours for non-scalp mowing.
- 5 adjustable cutting heights matches the cut for any job.
- Independent front and back axles let you follow ground contours more closely.
- Center pivoting steering lets you make sharper turns and closer trimming.
- Front mounted mower deck allows cutting under hanging trees and fences.
- Greater maneuverability for close trimming.
- Conveniently located controls for easy operation.

And More Features

- Adjustable, spring mounted seat adjusts to operator weight and height.
- Big 16" pneumatic tires for a smooth ride that is easy on the lawn.
- Headlight for night operation.
- Bumper guard surrounds the mower, protecting it during close trimming.
- Automotive type steering wheel for easy steering and control.
- Optional 32' showthrower, 32" snow blade and tow behind attachments add year round versatility.

This Is Not An Ordinary Rider . . .

The Bolens Lawn Machine

Backed by 25 Years of Riding Mower Excellence

These Are Not Ordinary Riders

25 years of riding mower excellence assures you of the best quality and the best performance.

Bolens products have a reputation for toughness, precision quality, long life and high trade-in value. That's because we're extremely careful in designing our products and because we test them almost beyond endurance.

We Give You Features

- Tough, fully enclosed gear transmission for long life and less maintenance.
- 5 speed transmission can be shifted on the go without clutching.
- Special isolated engine mount reduces vibration for added comfort.
- Engine is rear mounted leaving noise and heat behind.
- Precision engineered floating mower deck assures the best cutting possible with no scalping.
- The 5 cutting heights are easily adjusted with a single lever. From 1¼" to 3¼"
- Large turf tires for a smooth ride that is easy on your lawn.
- Quick steering for increased maneuverability.
- Automotive steering wheel for better control and comfort.
- An operator platform that separates operator from the mowing deck.

We Make Them Versatile

- All controls are centrally located on one easy to reach console.
- Foam padded seat for added comfort.
- The front axle is independent of the mower deck, meaning less scalping. . . since the mower will not follow holes or depressions.
- The axle is also independent of the steering wheel so that bounces are not transferred to the operator.

You'll find year 'round versatility in such optional equipment as a snow blade and tire chains for snow removal, dump cart, spreader, and sweeper for other yard chores...rear hopper/bagger..string trimmer and mower deck gauge wheels.

We Make Them Perform

Bolens riding mowers offer unsurpassed performance: from the quality of mowing excellence, ease of operation, human engineered comfort and control, dependable starting, operator safety to ease of maintenance. This Lawn Machine is built to perform.

We Make Them Comfortable

Comfortable padded seat easily adjusts to operator's size for real riding comfort. For extra safety, all models require a key, firmly set brake and disengaged mower blade before they'll start.

For extra convenience, all hand controls are conveniently labeled and placed on a single centralized control panel...no awkward reaching or stretching necessary.

The hinged hood provides quick access for easy service. Transmission and engine are mounted above frame so they're easily accessible, too. Gas tank and fuel lines are serviceable without being exposed to tree branches or other snags. Oil is easily drained without standing rider on end.

We Give You Selection

Three affordable models to choose from, including 8 hp Briggs & Stratton engine with recoil or electric start and 30" cutting width, and a powerful 11 hp model with a big 34" twin bladed mower deck for superb performance.

LAWN MACHINE ATTACHMENTS

BOLENS STRING TRIMMER

With automatic line feed - just tap on the ground and unit automatically releases more line.

Powerful high-torque motor.

Comfortable handle for easier operation.

Automatic line cutter built into guard.

Heavy-duty injection-molded construction.

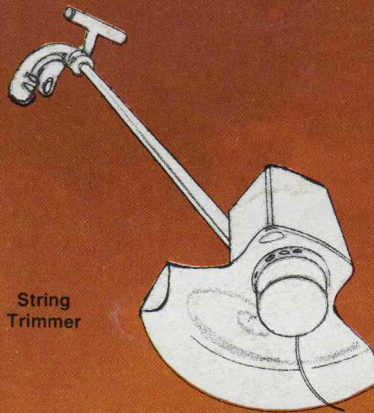

Cuts big 9" swath

Uses .065" diameter cutting line.

Super-light net weight 3 lbs.

Includes 10' coiled cord for use when portability is most important and a 20' straight cord for wide range applications.

Fits all Bolens Rear Engine Riders, Lawn Tractors, and Frame Steer Units with electric start.
