

3-POINT HITCH & ATTACHMENTS...

For All Our Magnatrac & Turf-Rider Tractors...

The new RH50 Three Point Hitch (shown "above-right" mounted to Magnatrac II) adds a new measure of versatility to your Struck-Kit Tractor. It allows you to use the complete new line of heavier and more efficient Three Point Hitch Attachments (displayed on these pages) in addition to our regular line of "sleeve hitch" attachments in our regular tractor catalogs.

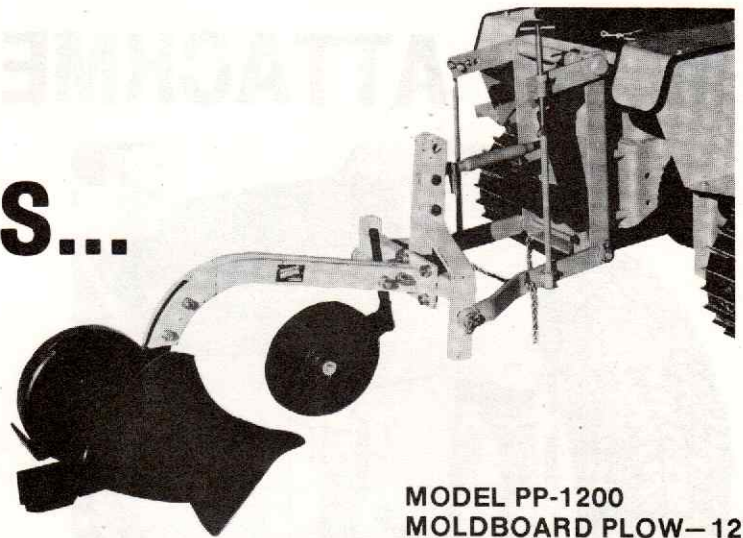

MODEL RH50 THREE POINT HITCH

A completely self-contained electrically operated category "O" Three Point Hitch (shown above). Available with or without Electric Lift Cylinder as it is interchangeable with the Cylinder on ELM-12 & ELM-12MT.

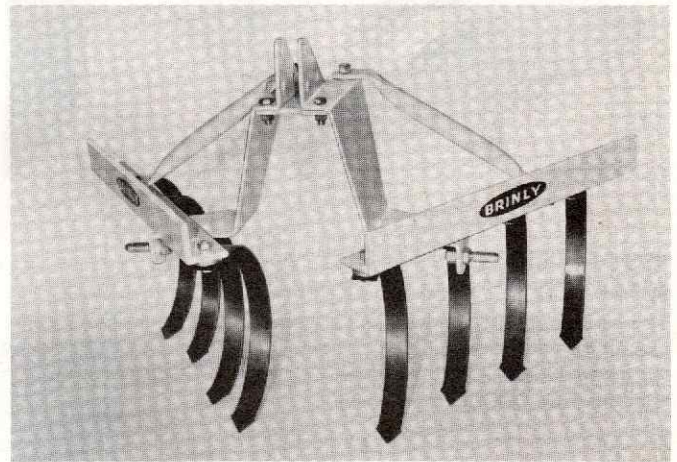

MODEL DD-1000 TANDEM DISK HARROW

Disk unit is equipped with four gangs, each having four 11" heat treated steel disks. Gangs may be set at angles of 10°, 15°, 20° or moved horizontally. Width of cut approximately 52". Heavy duty frame designed to hold concrete blocks for additional ballast. Weight, 182 lbs.

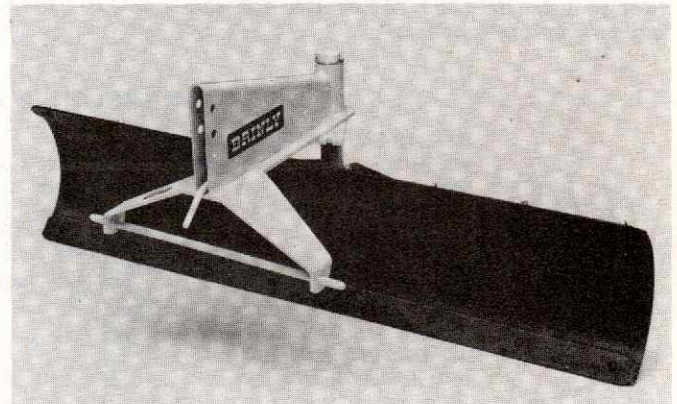

MODEL PP-1200 MOLDBOARD PLOW—12"

Plow (shown above) features adjustable gauge wheel with scraper to control plow depth in varying soil conditions; a "throwaway" share for lower replacement costs, 11" adjustable coulter and adjustments for landing and width of cut. Weight, 125 lbs.

MODEL CC-1000 SPRING SHANK CULTIVATOR

One row, adjustable frame unit with eight heavy duty spring steel shanks that can be positioned to meet row spacing and crop needs. Cultivator widths may be controlled by adjusting the frame struts to the frame angles, out to approximately 48". Gives high clearance (approximately 20") cultivation of crops such as corn, beans, tobacco, etc. Weight 64 lbs.

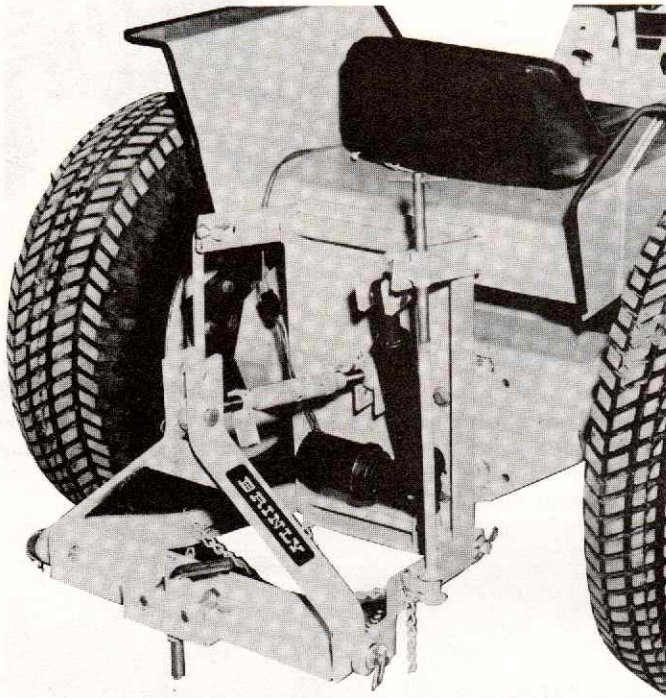

MODEL BB-1010 REVERSIBLE 5 FT. REAR BLADE

Heavy gauge, 5-foot steel blade may be angled 15° to 30° either side, or reversed. Attaches quickly to 3-point lift hitch; does not require removal of middle or front mounted mower. Ideal for landscaping, leveling, grading and snow removal. Weight, 150 lbs.

STRUCK KIT

C. F. STRUCK CORP
CEDARBURG, WISCONSIN 53012

MODEL HH-1000 3-POINT "A" FRAME ADAPTER WITH SLEEVE HITCH

This unit designed for adapting sleeve-type hitch implements for use on tractors equipped with category "O" 3-point hitch. **Required for using Model KK-350 Planter-Fertilizer, TT-100 Tool Bar and BB-363 Fork Lift Kit.** Weight, 28 lbs.

MODEL TT-100 TOOL BAR

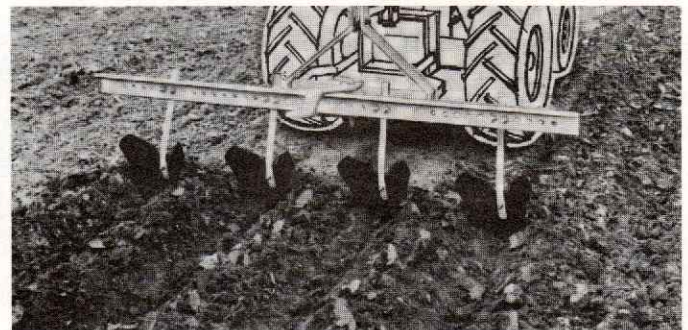

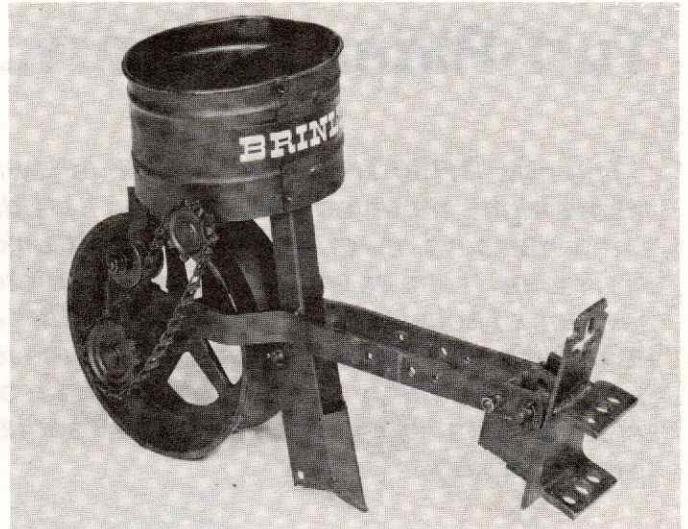

When equipped with the appropriate accessories, the Tool Bar extends the practical use of your tractor to operations such as: light grading, scarifying, seed bed preparation, cultivating, etc. Five foot steel angle bar welded to heavy duty hitch, with rear extension for attaching drags, etc. Weight, 40 lbs. (HH-1000 "A" Frame Adapter required for mounting TT-100 Tool Bar to Category "O" 3-point hitch).

(Shown with HH-1000 "A" Frame Adapter and four BB-220 eight-inch furrow openers)

MODEL KK-350 VEGETABLE PLANTER

A ground drive unit for use in prepared soil; capable of planting seed as small as radish and turnip, as well as corn, beans, peas, etc. Opens the furrow, drops and covers the seed at the desired spacing. Features a larger capacity seed hopper; new "float" plates that allow planter to follow ground contour; new shovel-type opening foot; new larger concave drive wheel which improves traction, reduces possibility of skidding and improves seed coverage. Equipped with 5 quickchange seed plates. (18 other seed plates available). Weight 70 lbs.

(HH-1000 "A" Frame Adapter required for mounting to Category "O" 3-point hitch)

ACCESSORIES FOR TT-100 TOOL BAR

BB-218 SCARIFIER KIT

Scarifier has unusual strength, good for breaking hard or heavily weeded ground. Can also be used for wide or double row cultivation. Kit comes complete with 8 shovels, standards, U bolts. (Wt. 28 lbs.)

BB-220 FURROW OPENER (8")

Blade with standard and U bolt clamp. (Wt. 5 lbs.)

BB-223 ADJUSTABLE LEVELING BLADE AND WINGS

4-foot high carbon steel blade with standards and clamps. Can be angled horizontally and vertically. Ideal for light grading, back filling, and finish grading. Scratcher-Rake Kit for fine seed bed preparation also available. Leveling blade can be used with regular double shovels in front of blade as scarifier combination. Blade with hardware, wings. (Wt. 28 lbs.)

BB-230 SWEEPS PACKAGE

Five 6" sweeps that fit regular standards plus two 6" clipped sweeps (1 r.h. and 1 l.h.) and attaching hardware. (Must be used with Scarifier Kit standards). (Wt. 5 lbs.)

BB-221 SHOVEL ATTACHMENT PKG.

2 Hiller Shovels, (1 r.h., 1 l.h.) with standards attached. For seed bed preparation, hilling or covering. Can be used in combination with regular shovels for throwing dirt to crop rows. (Wt. 6 lbs.)

BB-335 SPRING TOOTH KIT

Use similar to that of Scarifier Kit. Ideal for cultivating, especially in rocky soil. Kit includes 8 spring shanks with clamps and hardware. (Wt. 32 lbs.)

BB-342 DISK (11") HILLER PKG.

Consists of two 11" disk hillers, two 3/4" diameter standards and 2 clamps. (Wt. 12 lbs.)

TT-101 SCRATCHER RAKE KIT

This package contains 4 tooth holders, 42 rake teeth and attaching hardware. (Wt. 17 lbs.) For mounting with BB-223 Scraper Blade Kit.

TT-102 DISK GANG KIT

Used after plowing for sod busting. Disks can be adjusted to straddle the row; also may be used for small plant cultivation. TT-102 Disk Gang Kit consists of 1 r.h. and 1 l.h. hanger, 8 disks and attaching hardware. (Wt. 40 lbs.)
