

MISTBLOWERS

- ZEBRA
- ZENIT
- ZATURN
- MERCURY

MERCURY 4000

- Heavy duty sprayer
- High performance symetrical fan
- Fan straightening blades
- Synthetic blades, reliable and safe
- Top mounted V-Deflectors
- Adjustable Large double bottom deflectors
- Customised to your specifications

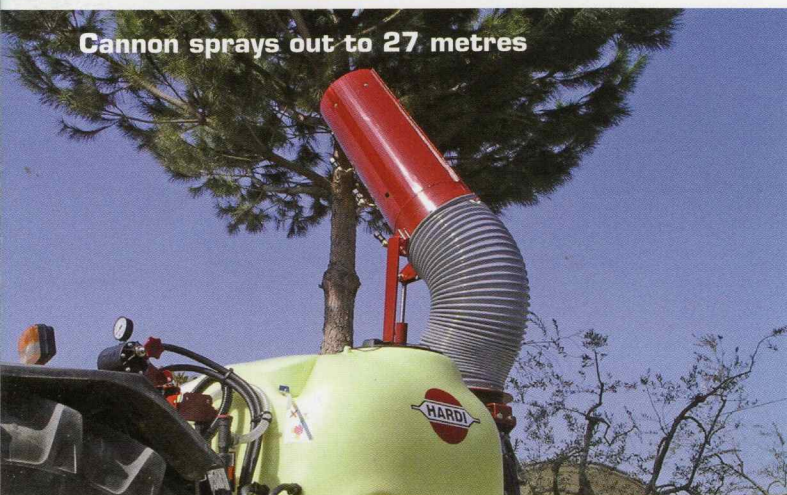

ZEBRA

Family of MISTBLOWERS for growers who want the convenience of a linkage sprayer with the power of a trailer sprayer

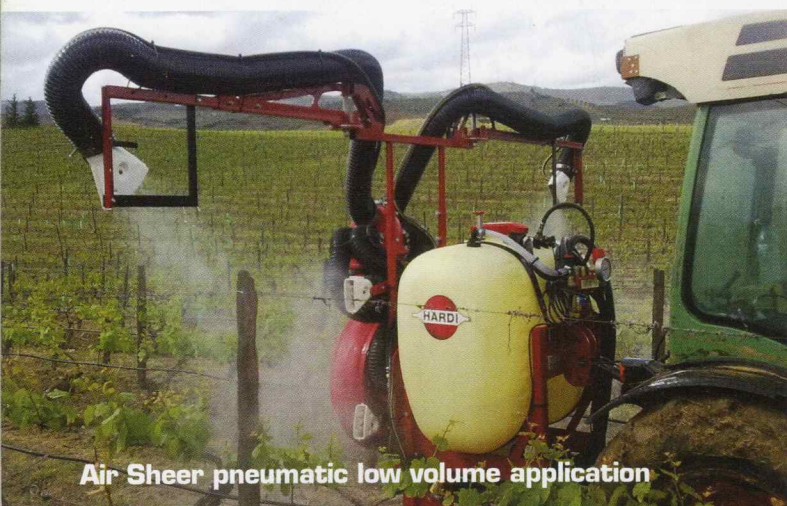

Adaptable to any type of fruit culture

Cannon sprays out to 27 metres

Versatile high/low hydro-pneumatic sprayer

Air Sheer pneumatic low volume application

Compact and efficient

- Lift mounted mistblowers available from 400, 600 and 1000 litres.
- A wide range of fan and turbine choices to provide optimum air generation for specific crop and working conditions.
- The air delivery systems ensures maximum air volume with the minimum power consumption.
- High quality air volume enables higher forward speeds while maximising penetration and efficiency of application.
- Chassis and tank profile provides low centre of gravity ideally suited to narrow and steep working plantations.
- Reliable, robust and easy to operate.
- Easy access for servicing.
- ZEBRA is designed for maximum drift control and minimum environmental impact.
- V-Deflector directs upper air to the target
- Adjustable bottom deflectors ideal for large trees

V-Deflector

Hydro-pneumatic solutions to suit your application

Hydraulic Nozzle droplets are formed when the liquid passes through the aperture. Droplet size is small to medium and operating pressure is 4 to 25 Bar.

Spout with 3 nozzles

Spout with 5 nozzles

Low volume Pneumatic Systems produce droplets when the spray liquid is torn off a shear plate by high speed air. Droplet size is very fine and operating pressure is between 1 and 4 Bar

Canon

Spout with 2 atomizers

Spout with 3 atomizers

Spout with 4 atomizers

Suspension

- Coil suspension for harsh conditions and road transport minimises chassis and operator fatigue
- Adjustable axle width

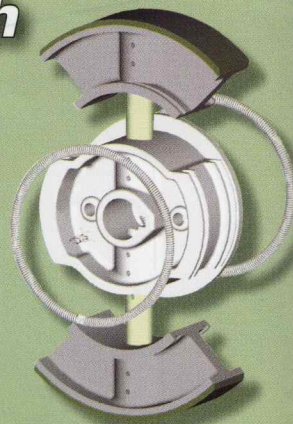

Tyres

- Options to suit all needs flotation, high clearance

Clutch

- Heavy duty centrifugal clutch for smooth engagement and outstanding reliability

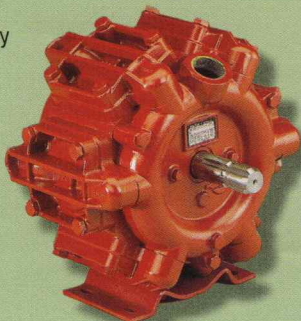

COVAMAX

- Biggest fan capacity in ducted delivery systems, with lowest hp consumption
- Excellent canopy penetration and coverage
- Adjustable converging air angles
- Open more nozzles as canopy grows
- Low maintenance boom system
- Versatile high/low volume spraying
- Greater control, less drift than most systems

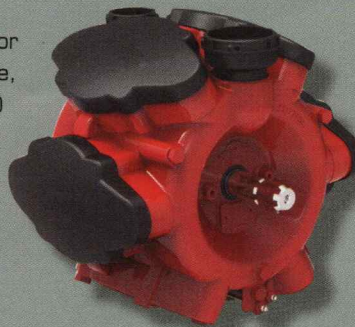

HARDI 363

- 363 diaphragm rotary pump
- Dry sump for easy service, rated to 20 Bar
- 140 litres per minute

HARDI 464

- 464 diaphragm rotary pump
- Dry sump for easy service, rated to 20 Bar
- 320 litres per minute

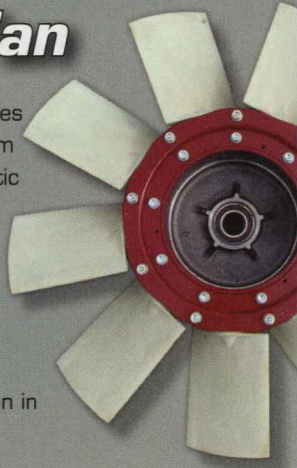

Large Deflector

- Adjustable large bottom deflectors
- Multiple vanes

Poly Fan

- 3% more air, blades manufactured from composite synthetic material
- Shock and fragmentation resistant
- The safest axial fan in the market

Tree Deflector

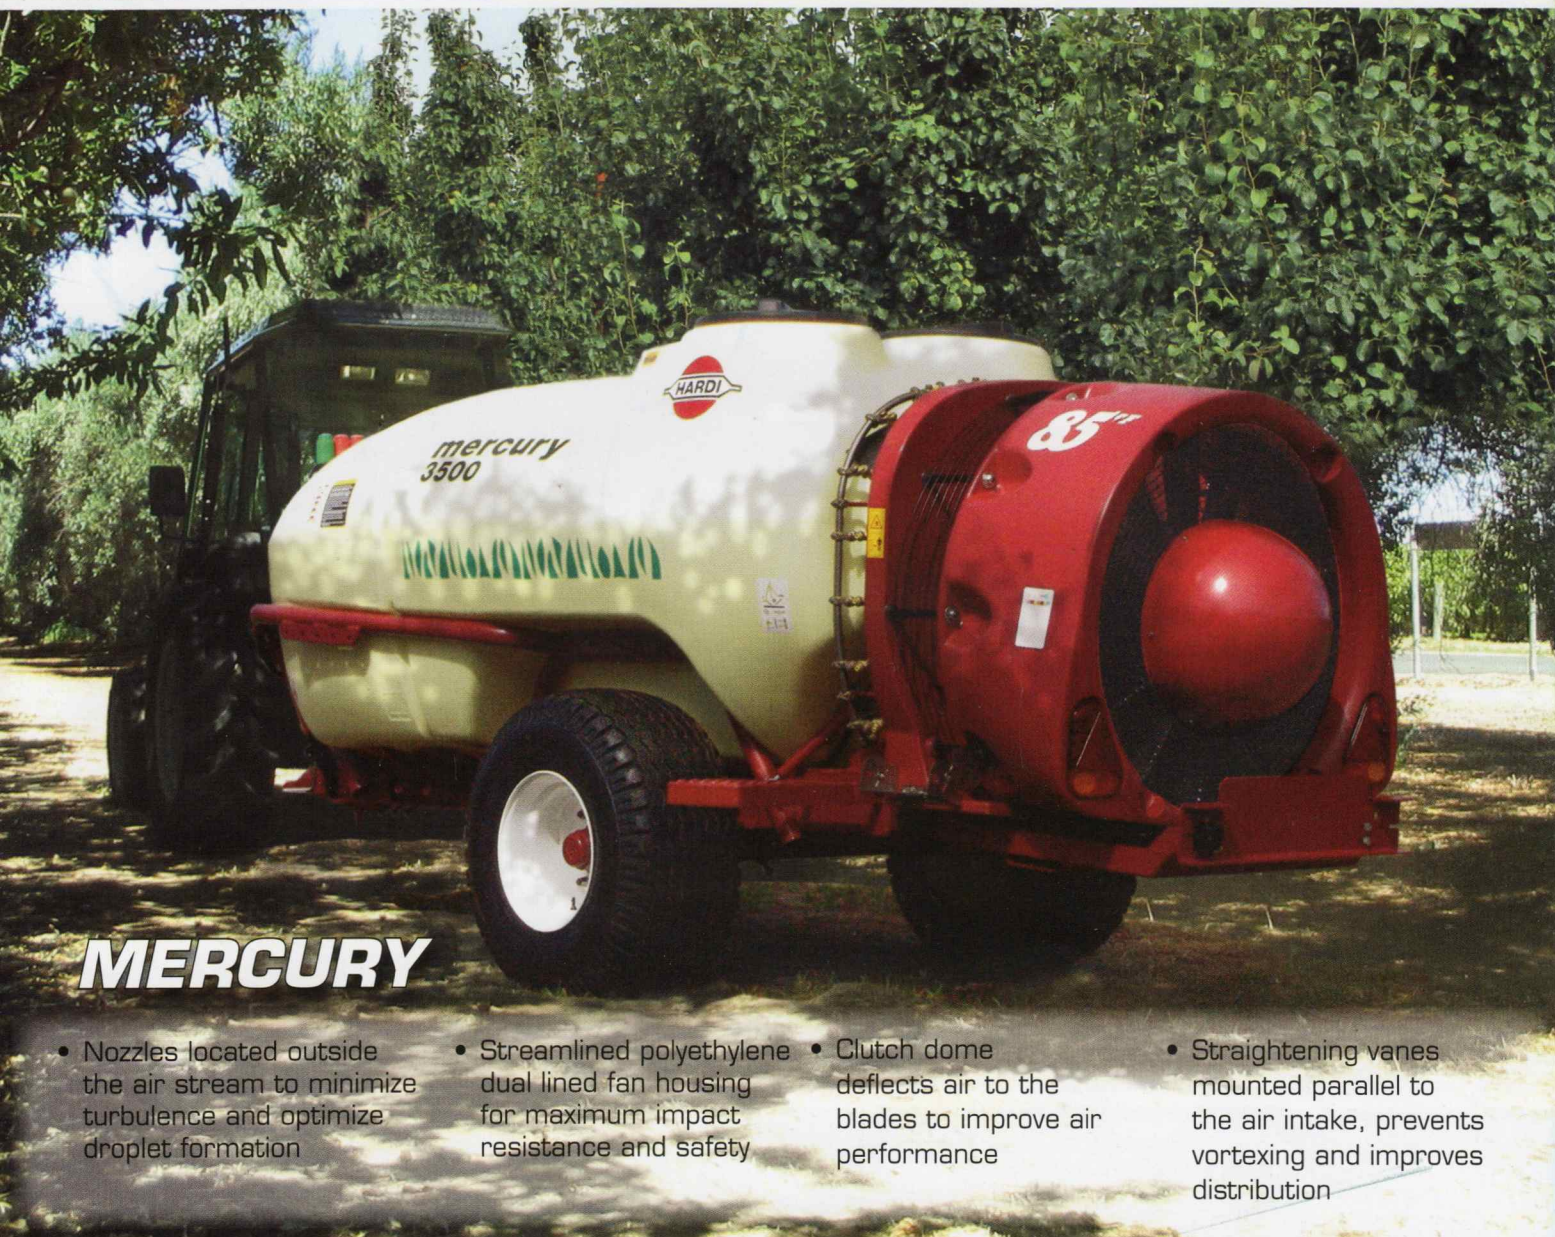

- Maximises air to the target and minimises off target drift
- Stainless steel construction
- Adjustable top deflectors

Vine Deflector

- The adjustable V-deflectors accurately directs air and sprays onto the target
- Stainless steel construction

MERCURY

- Nozzles located outside the air stream to minimize turbulence and optimize droplet formation
- Streamlined polyethylene dual lined fan housing for maximum impact resistance and safety
- Clutch dome deflects air to the blades to improve air performance
- Straightening vanes mounted parallel to the air intake, prevents vortexing and improves distribution

Braglia

- High pressure regulation and distribution control with constant pressure valves

HC 5500 / FB 3610 / SB 3610

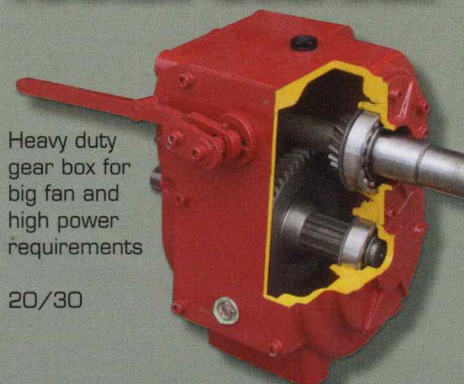

- Choice of rate controllers
- Quick to connect, easy to use, GPS compatible

HARDI Gearbox

- Heavy duty gear box for big fan and high power requirements

- 20/30

ZATURN

**Family of MISTBLOWERS
for growers who don't
need the sophistication
of the Mercury range**

Versatile tank and fan range

- 15 litre Hand Wash Tank for operator safety
- 70 litre Rinse Tank for in field cleaning (optional)
- Axial Fan 750 and 820 mm with latest synthetic blades for performance and safety
- Turbine Fan producing high speed and high pressure air for pneumatic air sheer low volume spraying
- 1500 litre ideal for steep terrain, with low centre of gravity and only 1350 mm wide
- 2000 litre fitted with stainless steel Tree Deflector delivers air to the target and minimises drift
- 3000 litre COVAMAX fitted with walking beam axle

Improve your application and coverage with nozzle adaptors

Dual adaptor body,
two jets required
739375

Triplet adaptor body,
three jets required
739290

Triplet adaptor body,
three nuts and jets
required
631304

CANNON

Indent Only

L-Spout

T-Spout

CANNON with M-Spout configuration

Adapts to crops with difficult spraying conditions, providing coverage up to 12 metres vertical and 27 metres horizontal

Powerful and versatile

- Two turbines available, provide optimum air distribution and maximum air volume, to match the spraying task 11,000 m³ and 19,000 m³
- Individual combinations of three different spouts provide the versatility and power
- The CANNON can be fitted to the linkage mounted ZENIT, the trailed ZATURN and MERCURY sprayers – tank sizes available from 400 to 4000 litres.
- Left to right hydraulic swinging spouts 180 degrees
- Hydraulic slanting spouts from -10 Degrees to 80 degrees vertical
- Heavy duty two-speed gear box and centrifugal clutch for smooth engagement and outstanding reliability

MISTBLOWER Configurations:

Model	Capacity (litres)	Pump	Axial or Turbine	Air kits available
ZEBRA	400 600 1000	Diaphragm	Axial Blowers: Hydro-pneumatic:	AG 750 AG 820 P 540 P 540 Double
ZATURN	1000 1500 2000 3000	Diaphragm	Axial Blowers: Hydro-pneumatic:	AG 750 AG 820 P540 P540 P640D
MERCURY	2000 2300 3000 4000	Diaphragm	Axial Blowers: Hydro-pneumatic: Air Sheer low volume optional high volume spouts available	SF65 and SF85 symetrical fan DUO DHT/DHV deflectors HEIGHT CONE MATCH JET manual deflector P540 and P540 Double Booms, B10 or B20 manual or hydraulic booms single row/double row P640 Double COVAMAX

HARDI Australia Pty Ltd

534—538 Cross Keys Road, Cavan
South Australia 5094 Phone: SA (08) 8343 9999
